

src/Classes/FileReader
/FileReaderException/FileReader
Exception.hpp

```
graph TD; A["src/Classes/FileReader  
/FileReaderException/FileReader  
Exception.hpp"] --> B["string"]; A --> C["exception"]; A --> D["iostream"];
```

The diagram illustrates the dependencies of the header file `src/Classes/FileReader/FileReaderException/FileReaderException.hpp`. Three blue arrows point from the header file box to three separate boxes below it, representing the standard library headers it includes: `string`, `exception`, and `iostream`.
