

src/Classes/FileReader
/FileReaderException/FileReader
Exception.hpp

```
graph BT; A["src/Classes/FileReaderException/FileReaderException.hpp"] <-- B["src/Classes/FileReader/FileReader.cpp"]; A <-- C["src/Classes/FileReader/FileReaderException.cpp"]
```

The diagram illustrates the relationship between three source files. At the top is a header file, 'src/Classes/FileReaderException/FileReaderException.hpp', which is shaded gray. Below it are two source files: 'src/Classes/FileReader/FileReader.cpp' on the left and 'src/Classes/FileReader/FileReaderException.cpp' on the right. Both source files have blue arrows pointing upwards to the header file, indicating that they include or inherit from it.
